The Dead Sea Source

## DEAD SEA TOILETRIES

### BALNEA The Dead Sea Source, Toiletries for your most demanding clients.

The Dead Sea is the lowest place on earth (410 m / 1.345 feet below sea level). Since ancient times it has been known for its high concentration of natural minerals. Its waters are so dense due to the high level of salinity that one can float there effortlessly.

A great many studies have proven, beyond a reasonable doubt, the effectiveness of its mineral components in the treatment and prevention of different maladies such as psoriasis, acne and rheumatism. Down through the centuries people have come to the Dead Sea from all corners of the earth to bath in its waters and receive mud treatments which are unique and not found in any other part of the world.

Idamenities Europe, with its wealth of experience in the manufacture of cosmetics, is proud to present the prestigious brand **BALNEA the Dead Sea Source** developed especially for hotels, resorts and spas in an "Amenities" format.

All of our cosmetics, produced entirely in situ at the Dead Sea, are made of top quality ingredients and natural plant extracts and feature a high concentration of minerals and salts extracted from the Dead Sea.

The **BALNEA the Dead Sea Source** line of cosmetics was developed for your most demanding clients featuring products of proven quality.
