TERRA. With natural Red Tea extract (Pu-Erh)

Red tea "Pu-Erh" is made from the semi-fermented tea leaves of "Camelia Sinensis" (Qingmao), a process which gives it its characteristic red colour. Used topically it clears sensitive skin, healing all of those small abrasions caused by the elements.

It is an excellent antiseptic and alleviates puffiness, burning and itching. Its use in cosmetic products allows it to work directly on skin helping to eliminate dead cells and fostering the regeneration of new cells, naturally rejuvenating skin.

This collection has the mild fragrance of Red Tea.

The TERRA Red Tea collection has no preservatives of the paraben family and paper packaging material is made from 100% recycled paper.

Your customers will be grateful.
